are requesting that the Environmental Assessment Worksheet (EAW) for a proposed 70 acre gravel mining operation be reviewed and that the planning commission forward findings of No Significant Environmental Effects and Negative Need for an Environmental Impact Statement (EIS) to the Blue Earth County Board of Commissioners; and

WHEREAS, Minnesota Environmental Quality Board (EQB) Rules, Section 4410.4300 subpart 12, mandates an EAW for this project. EAWs are required for non-metallic mining when 40 acres or more of land is excavated to a mean depth of 10 feet or more. An EAW is defined by State Statute to be a brief document which is designed to set out the basic facts necessary to determine whether an EIS is needed for a proposed project. The information disclosed in the EAW process is used to determine whether an EIS is needed and how the project can be modified to lessen environmental impacts if any are found to exist. The EAW for this project was prepared by I&S Engineers and Architects on the applicant's behalf.

The EAW was filed with the EQB and distributed to the agencies named on the EQB distribution list for review and comments. The EAW "notice of Availability" was published in the March 12, 2007 edition of the EQB Monitor. A notice advising that the EAW was available for review was published in the Mankato Free Press. In addition the EAW was posted on the Blue Earth County Web site and the I&S Engineers and Architects website. Copies of the EAW were furnished to the Blue Earth County Library and the Mankato State University Library. The comment period ended on April 11, 2007. Six comment letters were received during the comment period.

WHEREAS, the Planning Agency of the County has completed a review of the application and made a report pertaining to said request (PC 15-07), a copy of said report has been presented to the County Board; and,

WHEREAS; the request to locate a gravel mining operation in the Conservation Zoned District is a conditional use and does not conflict with the Land Use Plan; and,

WHEREAS; the Planning Commission of the County on the 1st Day of August 2007, following proper notice held a public hearing regarding the request, and following due consideration of presented testimony and information, voted unanimously to forward the matter to the County Board with a recommendation that a finding of No Significant Environmental Effects and a Negative Findings of Need for an Environmental Impact Statement be granted for the proposed project; and,

WHEREAS; on the 21st Day of August 2007, the Blue Earth County Board of Commissioners, following proper notice held a public hearing regarding the request, and following due consideration of presented testimony and information, voted to approve a finding of No Significant Environmental Effects and a Negative Findings of Need for an Environmental Impact Statement for the proposed project; and,

WHEREAS, the following conclusions have been reached based on the information provided by the applicant and the comments generated during the environmental review process supporting a finding of No Significant Environmental Effects and Negative Need for an EIS:

1. The EAW was published in the EQB Monitor on March 12, 2007 as required by EQB rules. During the comment period written comments were received from the Minnesota Department of Natural Resources, the Minnesota Department of Agriculture, the Minnesota Pollution Control Agency, The St. Paul District of the Army Corps of Engineers, and two area residents, Rebbecca Arndt and Al Berner. Comments were reviewed by I&S Engineers and Architects and County Staff. Responses to the comments were prepared and will be mailed to the commenters and the required EQB distribution list following approval of the EAW by the Blue Earth County Board of Commissioners.

There were no comments which indicated concerns that could not be addressed through conditions attached to the County Conditional Use Permit and/or permits required by the MPCA, DNR, and Army Corps of Engineers.

2. The EAW and permit/approval processes related to the SMC Madsen-Little pit have generated information which is adequate to determine if the proposed project has the potential for significant environmental effects.
3. The EAW serves to identify environmental issues, not to solve or approve of mitigation efforts. This information is used as a guide in issuing, amending, and denying permits and carrying out other responsibilities of governmental units to avoid or minimize adverse environmental effects and to restore and enhance environmental quality. The EAW is not used to justify a decision, nor do indications of adverse environmental effects necessarily require that a project be disapproved.
4. Minor environmental effects associated with the project will be adequately controlled through permits by the County and other regulatory authorities; specifically the Minnesota Pollution Control Agency, Minnesota Department of Natural Resources, and the Army Corps of engineers in a manner that will not become significant in the future.
5. Minor environmental effects associated with the project will be further controlled by the County and other regulatory authorities to a sufficient extent so as not to become significant when combined with other similar projects in the County, specifically within the Maple River Corridor.
6. The proposal does not conflict with the Blue Earth County Land Use Plan. Gravel Mining operations are a conditional use in the Agricultural, Conservation, and Shoreland Zoned Districts.
7. The County has determined, based upon review of available information and comment letters submitted by all pertinent State agencies, and on the criteria

established in Minnesota Rules 4410.1700, that siting and operating the SMC Madsen-Little Pit at this location does not have the potential for significant environmental effects.

8. The County has determined, based upon review of available information and comment letters submitted by all pertinent State agencies, that siting, constructing, and operating a gravel mining operation (the SMC Madsen-Little Pit) at this location will have no significant adverse effect on any of the areas of environmental concern required to be addressed by Minnesota Environmental Quality Board Rules, Chapter 4410.

NOW THEREFORE BE IT RESOLVED, by the Blue Earth County Board of Commissioners, that the request for a finding of No Significant Environmental effects and a Negative Finding of Need for an Environmental Impact Statement is hereby **granted**.

This finding of No Significant Environmental Effects and Negative Finding of Need for an Environmental Impact Statement shall become effective immediately upon its passage and without publication.

The motion carried. 2007-274
